

Pope Paul Primary School

Home learning for KS2

Week Beginning: 1st June 2020

Dear Pope Paul children,

We hope that you had a lovely half-term.

For this week, we have prepared lots of exciting and practical activities, giving you lots of opportunities to learn something new and useful.

We would like you to continue with your **morning lessons**. **Every afternoon we would like you to take part in this week's learning project which will be 'Viewpoints'**.

As always, keep sharing all your amazing work, creations and skills with us!

From

Miss Davey and Mrs Carey.

Viewpoints

1st June 2020.

This week our theme for learning is viewpoints. It is an opportunity for your children to learn about different viewpoints. It can be what they can see if they look out their window and then thinking about what other people could see if they were looking into your window. It can also be a great way of talking to your children and discussing their different points of view and listening to yours!

Physical viewpoints:

Drawing:

This is all about what you can see and then finding a different way of looking at it. **Art** is a great way to explore this!

Find an object that is easy for your child to draw and get them to sketch it. After, get your child to change position such as sit on the other side of the table or sit further away from the object. Get them to draw the object again. Is it any different? How is it different? Is it bigger or smaller? Can you see something that you couldn't see before when you first drew it?

Whatisewhen - The Spiral Project

Ever see a shape in the clouds? Or use your imagination to make things come to life? Using the spiral as a tool, use your imagination to draw what you see. It could become a flower, a face, or even a planet in the solar system! You can choose whatever you want it to be, that is the power of using your imagination and viewpoint. It is like a superpower, so let's see yours and get drawing!

Here are some other children's work for inspiration:

**use your imagination
and draw around the spiral
to show what you see...**

Things can look very different from different places.

So we have to use our knowledge of viewpoints to help us identify things. Let's try some out!

Can you name these London landmarks?

Here are the same landmarks but from a different view. Can you work out what the landmarks are now? Some are a little tricky so you may need help. Think about different clues that might tell you which landmark it could be. Is it near water? What is the shape of the roof like? What colours can you see?

**What
viewpoint
have these photos been taken
from?**

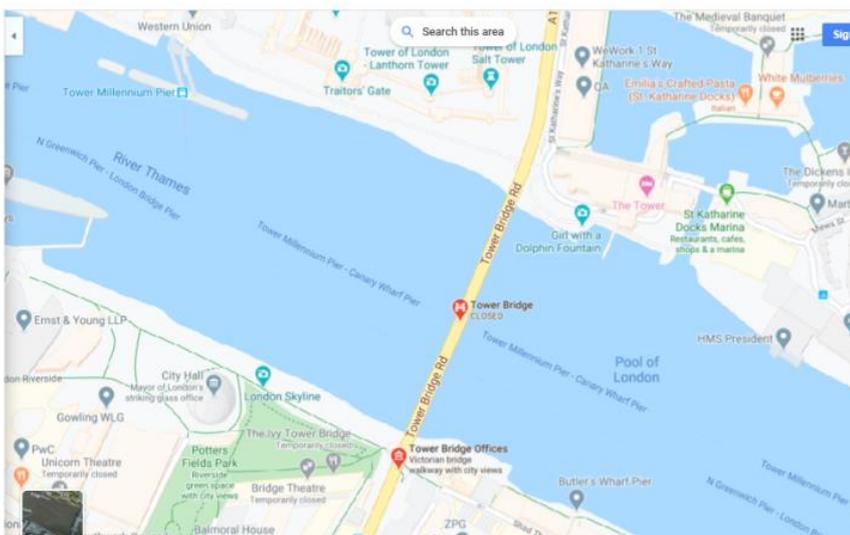

These photos have been taken from above. We call this an **aerial viewpoint**. Aerial means ‘in the air’. Why might aerial views be useful?

They help us make maps! Maps help us know where we are and tell us how to get to places.

This is an aerial view.

This is a map.

What is the **same** and what is **different** about the two pictures?

Aerial views: these are detailed pictures or photographs taken from above the objects.

Maps: are a simpler version of the aerial view, with less detail (such as bricks and small details aren't shown) making it clearer for people to use for directions.

Map creating:

You're going to have a go at creating your own map. You can choose to draw a map of your bedroom or your street/road.

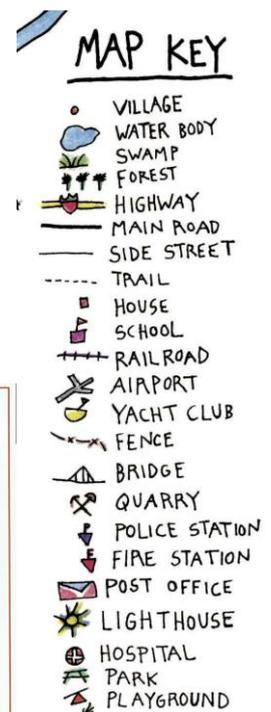

Things to remember:

Maps are drawn from an **aerial viewpoint**.

Think about if all your furniture is the same size.

Is your bed seen from an aerial view going to be smaller than your chair?

Maps have keys to help the reader know what your pictures mean.

Here are some examples of maps to help you create yours.

Different people's viewpoints:

These are activities where your child can explore their own viewpoints or that of other people. It is about exploring what they and other people think about different topics.

Below is a link to a short video. It raises the issue of 'what is fair?' You can pause the video at different points and discuss with your child what is happening and what they think about it. Give your viewpoint as well as listening to other's views is just as important. You can go into as much or as little depth as you want.

<https://www.bbc.co.uk/teach/class-clips-video/pshe-ks1-ks2-what-is-fair/zh98qp3>

Writing task:

Tell your child they are going to be presenting to the School Council about school uniform. They need to think and write down the following things.

Do you think it is a good idea to wear school uniform or is it not a good idea?
Write down why uniform is a good idea.
Write down why uniform is not a good idea.

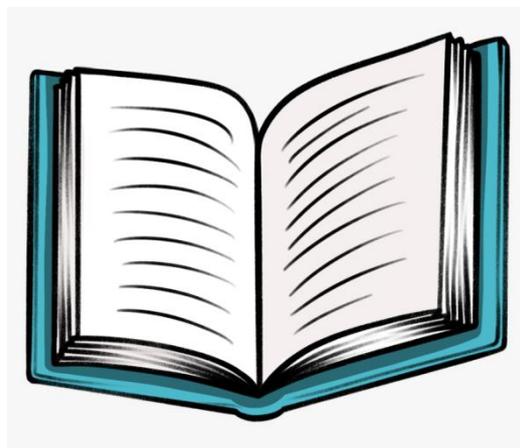

Get your child to design a new uniform and draw and colour it. They can answer these questions: will it be the same for boys and girls? Why is this uniform better than the one we already have?

Reading:

We hope that you are continuing to read with your children. It is incredibly important that they are doing some reading each day. If your child enjoys listening to stories as well as reading them, below is a website with other links to authors reading stories for children each day.

Music

Every two week's we will be looking at a composer. This week our Composer is Smetana with his compositions, Moldau. It is a beautiful piece all about a journey down the river of that name. Please listen and discuss the piece with your child (See the separate document all about the piece has been sent). We would like to remind you of the great free music resources available to you. Music is a wonderful tool that has the ability to lift spirits in these tough times. Please take a look and enjoy!

Keeping Active:

Keeping active and moving during this time is also very important. We hope you are finding ways of keeping fit. Make sure that you look at Miss Pringle's Blog which gives you lots of suggestions on ways to keep active.

We look forward to seeing more of your work! We really enjoy seeing all you've been doing at home so please keep sending it to:
