

Additional home learning links to support Year 1

I have compiled a list of additional home learning sites that parents may wish to use to support and challenge your children further if the home learning I have set is not loading or working for you then you always have alternatives:

<https://www.topmarks.co.uk/maths-games/5-7-years/counting> You are able to select Maths and English games in different levels

<https://www.ictgames.com/> Maths and English games

<https://www.bbc.co.uk/bitesize/levels/z3g4d2p> Has every curriculum area support if there is something your child is finding challenging or if they want to develop an interest further.

<https://thirdspacelearning.com/blog/maths-games-ks1/#2-2-number-game-total-of-10-> This contains videos on how to play some of the maths games so this one is very useful for family fun home learning. I am happy to lend out resources if needed.

<https://mathsframe.co.uk/en/resources/category/22/most-popular> Maths Frame contains interactive games.

https://www.youtube.com/playlist?list=PLB5TN0ac12P_p1yZu7bieuGfK8X5pptza Oxford Owl has a playlist on you tube that explains the way maths methods are taught in primary schools. We all know the children learn very differently from how we were taught at school so these have proved very valuable to parents in the past; I hope they are of some use to you.

https://www.mathplayground.com/grade_2_games.html If using this site to support maths leaning then please select 'Grade 2' with is the same as Year 1.

https://www.youtube.com/channel/UCP_FbjYUP_UtldV2K_-niWw/featured The DfE has produced phonic videos for every sound and there are lessons to watch to ensure the correct sounds are said.
